01070810979

Elwraq, Giza, Egypt

Frontend Developer with hands-on experience building React and Next.js applications. Skilled in TypeScript, REST API integration, TanStack Query, Redux Toolkit, responsive UI development, and reusable component architecture. Built and deployed dashboard and real-time chat applications.

Education

- **Bachelor's Degree in Mathematics, Helwan University — Oct 2024**

September 2020 - October 2024

Skills

Frontend Core: TypeScript, JavaScript (ES6+), HTML5, CSS3, responsive design, and accessibility.

Frameworks & Libraries: React.js, Next.js, React Router DOM, App Router, and Server Actions.

State Management: Redux Toolkit, TanStack Query, Context API.

UI & Styling: Tailwind CSS, Recharts, Framer Motion, GSAP.

Forms: React Hook Form, Zod.

API: Axios, REST APIs, Authentication (JWT).

Tools: Git, GitHub, Vercel, Netlify.

Projects

Inventory Management Dashboard | Next.js 16, TypeScript, Tailwind CSS, TanStack Query

<https://inventory-dashboard-beryl-zeta.vercel.app> <https://github.com/Abdo5-Mahmoud/Inventory-Dashboard>

Built a responsive inventory management dashboard using Next.js, TypeScript, Tailwind CSS, and TanStack Query. Implemented product browsing, search, filtering, sorting, pagination, CRUD flows with React Hook Form and Zod, and analytics charts with Recharts. Integrated DummyJSON as a mock API with server-side prefetching and client-side cache hydration.

Hotel Management Dashboard | React, Supabase, React Query

hotel-management-system-git-master-abdallahs.vercel.app github.com/Abdo5-Mahmoud/Hotel-Management-System

Built an internal hotel operations dashboard for managing cabins, bookings, check-in/check-out workflows, and daily activity. Used React, React Query, Supabase authentication/database, React Hook Form, and Recharts to create a responsive management experience.

Chat Application | React, Node.js, Express, MongoDB, Socket.IO

github.com/Abdo5-Mahmoud/chatApp_frontend

Built a real-time chat application using React, Redux Toolkit, Socket.IO, Node.js, Express, and MongoDB. Implemented JWT-based authentication, protected routes, direct messaging, persistent conversations, form validation, and error feedback.
